INSTINCT BEFORE FORMULA.

Marc Stan is a Montenegro-based DJ and producer whose work connects driving techno, hypnotic movement and cinematic tension. With more than two decades behind the decks, his sets are built in real time: reading the room, shaping momentum and turning pressure into collective release.

His productions balance dark, functional club energy with an uplifting emotional edge. Releases on IAMT, Replicate and Redlof have earned Beatport chart recognition and international support, while Mixmag Adria has featured his current artistic direction.

That direction converges in Pulse Dimension, his long-term creative platform where sound, space and crowd energy become one shared environment.

THE ROOM DECIDES WHERE THE SET GOES.

No fixed order. No repeated formula. Each performance is shaped around the people, the space and the exact moment the energy changes.
